

# Groundhog Day

February 2 is Groundhog Day in the United States. Groundhogs are small, furry animals that live underground. People started watching groundhogs many years ago. Today, there is a famous groundhog named Punxsutawney Phil. Many people wait outside Phil's hole to see what he will do on Groundhog Day.

Why do people watch Phil? If it is a sunny day, Phil will see his shadow and quickly go back into his hole. Then, some people say that there will be six more weeks of winter. If it is a cloudy day and Phil does not see his shadow, he will stay outside. Then, some people say that winter will end in less than six weeks.
